**Laufer Customs Update: ACE Entry Filing**

To Our Valued Customers,

As you may already be aware, by the end of 2016, the Automated Commercial Environment (ACE) will become the Single Window - the primary system through which the trade community will report imports and exports and the government will determine admissibility. Through ACE as the Single Window, manual processes will be streamlined and automated, paper will be eliminated, and the international trade community will be able to more easily and efficiently comply with U.S. laws and regulations.

November 1<sup>st</sup> 2015 now begins a transition period for electronic entry and entry summary filings in ACE.

**What we are doing:** Laufer Group International has developed a test environment in which we are inputting test entries in ACE to determine what ACE codes need to be added. We are on task and on time to ensure that our clients' entries comply completely with all new U.S. customs regulations.

We will continue to keep you updated as necessary and if you have any questions in the meantime, please contact your local Laufer representative.

Thank you for your continued support.

Laufer Group International, LTD.
